

WILDFLOWER

2018 CABERNET SAUVIGNON

WESTERN AUSTRALIA

Wildflower Western Australia There are over 12,000 species of wildflowers that grow in Western Australia, over half of which cannot be found anywhere else on earth. The native bush surrounding our vineyards abounds with these vivid blooms providing a distinctive wine landscape like no other.

Tasting Note Just like the region's flora, this wine is distinctively Western Australian - a prime example of this blend, boasting intricate flavours and fine tannins developed from the region's mild summers, reliable springs and cool ocean breezes. Fruitful and vibrant, with dark berries, plum fruit and a delicious texture.

Technical	Notes	Alc/vol:	14.0%
pH:	3.70	RS:	2.00 g/L
TA:	6.40 g/L	CLOSURE:	Screw Cap

6 of 12,000 Sturt's Desert Pea - Swainsona Formosa (plant family: Fabaceae).

This species, a member of the pea family, Fabaceae, is confined to Australia, where it occurs in all mainland States except Victoria. The original collection was made in 1699 by William Dampier on Rosemary Island in the Dampier Archipelago where he collected a specimen.
