

WILDFLOWER

2018 SHIRAZ

WESTERN AUSTRALIA

Wildflower Western Australia There are over 12,000 species of wildflowers that grow in Western Australia, over half of which cannot be found anywhere else on earth. The native bush surrounding our vineyards abounds with these vivid blooms providing a distinctive wine landscape like no other.

Tasting Note Just like the region's flora, this wine is distinctively Western Australian - a flavourful and vibrant Shiraz displaying characters of wild cherries and delicious plums, with lingering, refined silky tannins.

Technical Notes Alc/vol: 14.0%
| pH: 3.60 | RS: 2.60 g/L
TA: 6.30 g/L | CLOSURE: Screw Cap

7 of 12,000 Brown Boronia - Boronia megastigma or Brown Boronia - a small shrub native to southwestern Western Australia occurring from Perth to Albany. Boronia megastigma grows to less than a metre. It has small leaves and small cup-shaped flowers, which occur in spring. The plant is quite striking in that the flowers are bright yellow inside whilst the exterior is an interesting red-brown colour. The flowers have a wonderful fragrance and are used in the production of essential oils.
