

WILDFLOWER

NV BRUT CUVÉE

WESTERN AUSTRALIA

Wildflower Western Australia There are over 12,000 species of wildflowers that grow in Western Australia, over half of which cannot be found anywhere else on earth. The native bush surrounding our vineyards abounds with these vivid blooms providing a distinctive wine landscape like no other.

Tasting Note Just like the region's flora, this wine is distinctively Western Australian - sourced from Pemberton and Margaret River, this chardonnay based sparkling has delicate layers of citrus and apples, complimented by toasty nutty yeast. A refined elegant effervescence.

Technical	Notes	Alc/vol:	12.0%
pH:	3.13	RS:	5.30 g/L
TA:	8.50 g/L	CLOSURE:	Cork

5 of 12,000 Pin-cushion Hakea - Hakea laurina (akea laurina) is one of the most admired native plants of south-western Australia, and is grown in quantity in Australia and other countries. In Italy and America its uses include street and hedge planting. The general impression is of bold and handsome foliage, slightly blue-green, though closer inspection shows that the foliage is blemished at various times of the year with fungus spots. The simple and shapely leaves are widely spaced and wave and curl attractively. They are up to 15 cm long, thick and smooth, with rows of prominent veins.
